

LAHZA / COLOR SYSTEM

A quieter way to hold time.

A refined palette for the Chrome focus timer, built from olive charcoal, parchment, sage, brass, and clay.

DESIGN DIRECTION

Stone / stillness / warm light / one deliberate accent

Prepared from the Forge-Extension repository and current Lahza UI states.

What the current app is saying

PLAYTEST READ

STRONG

A coherent calm, warm-neutral identity.

WEAK

Body text, borders, and panels merge together.

WEAK

Focus, break, and long-break states need clearer color roles.

OPPORTUNITY

The timer ring can become the main emotional signal.

THE RECOMMENDATION

Keep the warm gray atmosphere, but deepen the canvas and lift the text. Use parchment for focus, sage for breaks, brass for milestones, and clay only for warnings.

INTERACTION PRINCIPLE

Idle is quiet. Running gains a soft halo. Completion earns brass. Errors never borrow the focus color.

Semantic colors, not decorative colors

CANVAS App background #292A24	CANVAS SOFT Dock / inset #303129	SURFACE Cards / fields #373830	SURFACE HOVER Hover / pressed #41423A
SURFACE STRONG Selected neutral #4B4C43	INK Primary text #F1EDE3	BODY Secondary text #D2CCCC	MUTED Metadata #AAA398
PRIMARY Focus / CTA #DED4BF	SAGE Break / success #A7B88D	BRASS Long break / milestone #D3B875	CLAY Danger / reset #C8837D

WHY THIS WORKS

The palette still reads as Lahza, but the darker base creates depth, the text becomes legible, and each timer mode owns one restrained accent.

Map each color to one job

FOCUS
#DED4BF

Timer ring
Primary button
Live status halo

BREAK
#A7B88D

Timer ring
Success dot
Positive chart state

LONG BREAK
#D3B875

Timer ring
Milestone card
Achievement accent

DANGER
#C8837D

Destructive reset
Validation error
Never used for focus

ACCESSIBILITY CHECK

Ink on canvas	12.4:1	AA PASS
Body on canvas	9.1:1	AA PASS
Muted on canvas	5.8:1	AA PASS
On-primary on primary	9.8:1	AA PASS

Drop-in CSS tokens

```
:root {  
  --canvas: #292A24;  
  --canvas-soft: #303129;  
  --surface: #373830;  
  --surface-hover: #41423A;  
  --surface-strong: #4B4C43;  
  --ink: #F1EDE3;  
  --body: #D2CCC0;  
  --muted: #AAA398;  
  --hairline: #5A5B51;  
  --primary: #DED4BF;  
  --on-primary: #292A24;  
  --success: #A7B88D;  
  --gold: #D3B875;  
  --danger: #C8837D;  
}
```

IMPLEMENTATION NOTES

- 1 Keep the current Inter plus JetBrains Mono pairing.
- 2 Use 1 px hairlines only on interactive boundaries.
- 3 Reserve primary for focus and the main action.
- 4 Give the running ring a 20-24% primary halo.
- 5 Use clay on confirmation states, not on passive Reset text.
- 6 Charts should default to body; today can use primary.

ONE RULE

The interface should feel composed before it feels colorful.
